## **EDUCATION**

#### University of Waterloo

Sep 2020 - Apr 2025

Candidate for Bachelor of Honours Computer Science – Software Engineering Specialization Relevant Courses – Intro to AI, Algorithms, Data Structures, User Interfaces, Database Management, Software Design

#### WORK EXPERIENCE

## Machine Learning Engineer Intern

May 2024 - Aug 2024

Toronto, ON

Bell

• Executing DevOps for ML models, built and trained in-house, stored as **Docker** images using **TerraForm**, **Kubernetes**, **GCP**, **Jenkins**, and **OpenShift** to help Bell customers across Canada find solutions to their complex problems easily.

## Cloud Backend Engineer Intern

May 2023 - Aug 2023

Toronto, ON

Deloitte

- Engineered a system to enable users to search for data from 2,000+ cloud bundles stored in MongoDB using C# and .NET, implementing advanced string matching and a dynamic Mongo query builder for streamlined data retrieval.
- Built a backend service that schedules task execution for cloud account provisioning accelerating the process by 50%.
- Constructed an object-oriented caching service using Redis Cache to enhance cloud account data retrieval speeds by 10x.

## Backend Engineer Intern

Jan 2023 - Apr 2023

OpenLane

Toronto, ON

- Implemented **AWS Serverless** REST APIs in **TypeScript** with **PostgreSQL** and **Elastic Search** databases to execute business logic for online car auctioning involved building lambda functions, controllers, query builders, and post-processors.
- Built a **NodeJS** script to run multiple threads in parallel to query 6 million rows of data from **OracleDB** to update development databases weekly. Improved performance by **160%** when compared to single-threaded querying.
- Formulated 40+ Cucumber integration, Jest unit, and Mocha unit test cases ensuring code reliability and robustness.

#### Frontend Developer Intern

May 2022 - Aug 2022

TutorOcean

Ottawa, ON

- Utilized ReactJS, MeteorJS, and CSS to implement new features on the B2C EdTech platform, such as a tutor availability blocking system, and fix over 40% of issues reported across all B2B SaaS products.
- Diagnosed and documented complex issues by finding patterns in data retrieved from MongoDB using Studio3T.

#### **PROJECTS**

#### Red Wine Quality Classifier 🔾

- Built a non-linear deep neural network with **Sigmoid** and **ReLU** activation functions and the **Mean Squared Error** loss function to predict the quality of red wine, given its physical attributes rating can be a decimal from 0 to 10.
- Trained the model for **500 epochs** with **k-fold cross validation** on a wine quality dataset in batched gradient descent using **Python** with **NumPy**, **Matplotlib**, and **SkLearn**. MAE was **0.7**, making it accurate (0.7 away from true rating).

## TripTailor (UofTHacks AI Project) (7)

- Engineered and built a multi-table **PostgreSQL** database to store users, destinations, and their relationships, managed by **ElephantSQL**, for an AI platform that enables users to make travel plans for any country in the world with ease.
- Enhanced user engagement by fetching and displaying images to the **ReactJS** frontend from **Unsplash API**, whose queries consist of countries, cities, and locations being generated with prompt engineering through NLP by **Cohere API**.

#### KeyHaven (7)

- Built a password management platform with industry-level security: master passwords encrypted with **BCrypt** algorithm, passwords stored with **AES-256** encryption, and data sent to client via **HttpOnly** session cookies stored serverside.
- Utilized **Docker** to containerize the **NodeTS** frontend and **Express** backend, ensuring seamless deployment and scalability.

### TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, C#, C, Kotlin, SQL, HTML/CSS

Frameworks: React, Node, Flask, Material-UI, .NET, Express, TailwindCSS, NextJS, Redux, Swagger, Cucumber, Jest, Mocha Developer Tools: Git, Linux, TerraForm, Kubernetes, OpenShift, MongoDB, PostgreSQL, OracleDB, Elastic Search, Postman, AWS, GCP, DBeaver, Studio3T, Redis Cache, Docker, Heroku, Jenkins
